## Obelia & little Obelia Pendant Lights

are a collection of local artisan made spun aluminium pendant lights beautifully complimented by angled natural solid timber rims. Obelia with the additional bent timber arc and timber dowel will hang comfortably in both residential and commercial environments, especially suiting bent timber furniture. Little Obelia minus the timber arc is a minimal version of Obelia.

Influenced by natural gum nuts the pendant lights are named after a gum - nut baby character by May Gibbs.
